

Design is the Difference™

D-Scaler
System

Continuous Scale-Free Operation

If hard water or mineral deposits are decreasing the efficiency of your process heating and/or cooling, then you need a Mokon D-Scaler. This system has been proven to remove rust, scale and/or lime deposits from your process, as well as Mokon systems, or any other circulating temperature control system. This unit will increase the efficiency of your process while prolonging the life of your equipment.

The D-Scaler is portable and lightweight, making it easy to install and easy to operate. It is designed to circulate Mokon D-Scaler Fluid, a nontoxic, nonflammable liquid

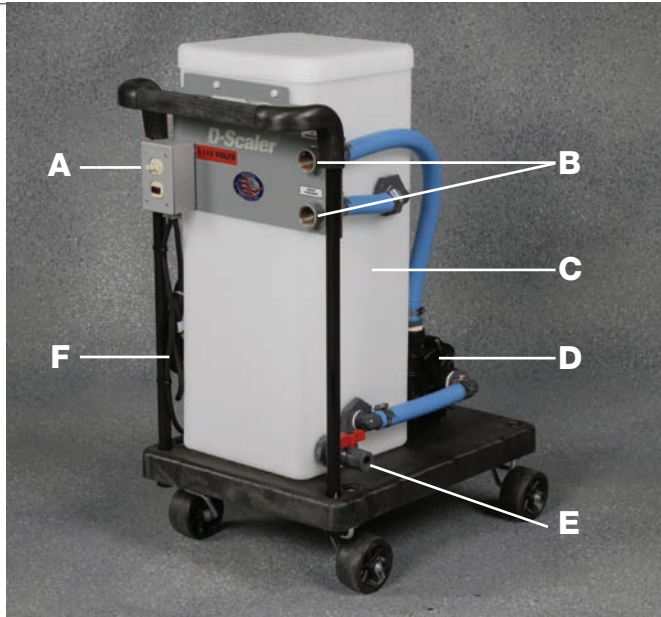

Before / After

that quickly dissolves any deposit buildup. This USDA-approved fluid will circulate through your process safely with no harm to your equipment or to the environment.

- **Removes rust, scale and/or lime from your system**
- **Compact and portable**
- **Easy to operate**
- **All noncorrosive materials**
- **Easy to install**
- **Prolongs the life of your equipment**
- **Nontoxic, noncorrosive and nonflammable fluid**
- **Fluid is USDA approved**

Quick Removal of Rust, Scale and/or Lime Deposits

Standard Features

The Mokon D-Scaler offers many features as standard to provide an effective way to remove rust, scale and/or lime deposits from your process or circulating temperature control system.

- A** Illuminated on/off toggle switch mounted in operator-friendly orientation
- B** Easily accessible, threaded fluid connections
- C** Reservoir
- D** Pump and motor
- E** 1/2" NPT drain on side of tank
- F** Power cord

Specifications

Series	Pump	Tank Capacity (gallons)	Operating Temperature (°F)	Motor (hp)	Voltage (1phase, 60hz)	Full Load Amperage	Dimensions L x W x H (inches)	Shipping Weight (approx. lbs.)
Small	25 GPM @ 15 PSI	15	ambient	1/2	115	8.4	25.5 x 18 x 35	60
Large	25 GPM @ 32 PSI	15	ambient	3/4	115	11.6	27.5 x 21 x 35	100

Fluid and hoses are sold separately.

D-Scaler Fluid

Mokon's D-Scaler Fluid is a nontoxic, nonflammable liquid that quickly dissolves any deposit buildup. This USDA-approved, noncorrosive fluid will not harm your equipment or the environment. It is available in 5 and 55 gallon containers. Both the fluid and hoses are sold separately from Mokon's D-Scaler unit.

Warranty and Delivery

Mokon offers a one-year warranty as standard. The D-Scaler is designed for long trouble-free service and is constructed with reliable parts and durable materials. Both sizes of the D-Scaler are in stock for immediate shipment. Call Mokon for more information on availability and pricing.

Stainless Steel Manifolds

Custom stainless steel manifolds are available to assist in the distribution of heated or chilled water and/or oil in your process. The manifolds consist of welded construction, 304 stainless steel, threaded pipe couplings, and are easily customized to any configuration. Consult Mokon for more information.
